PROJECTS

Food House | A Food Ordering Website

[\(Project Link\)](#)

- Developed a dynamic web-based food ordering platform with categorized food sections and integrated cart functionality. Implemented user-friendly navigation, restaurant service options, and real-time item management to enhance customer experience and streamline restaurant operations.
- Tech Stack:** HTML, CSS, JavaScript, Git, GitHub

Weatherly | Weather Tracking Web Application

[\(Project Link\)](#)

- Built a responsive weather application that provides real-time weather updates based on user-inputted city names. Integrated API calls to fetch live weather data and used local storage to let users save and quickly access favorite locations. Enhanced user experience with dynamic data rendering and a clean, intuitive interface.
- Tech Stack:** HTML, CSS, JavaScript, Git, GitHub

Rockstar UI Recreation | Rockstar Games Themed Web Clone

[\(Project Link\)](#)

- Developed a responsive clone of the Rockstar Games website featuring modern UI elements and interactive user experience. Implemented user authentication with sign-up and sign-in pages. Integrated video functionality to allow users to browse and watch trailers of various Rockstar games, replicating the look and feel of the original site.
- Tech Stack:** HTML, CSS, JavaScript, Git, GitHub

EXTRA-CURRICULAR ACTIVITIES

Chess Team Leader in Inter-College Championship

- Led a chess team in a highly competitive inter-college championship featuring over 40+ teams. Strategized game plans, analyzed opponents, and mentored teammates, resulting in a 30% improvement in team performance. Successfully secured a top 5 finish in Championship.
